About me

I'm an autodidact Full-Stack Web Developer.
I love to learn, plan, build and design, to maintain and deliver an excellent result, whatever the task is.
I believe in a can-do attitude and I'll always do my best to succeed.

I'm looking for a place I can give 100% of myself, using my skills and being productive. I'm excited about the idea of being a part of an intellectual team, sharing knowledge, collaborating and becoming better.

Projects

Click for Demo

Eagle Vision: A React Web App for face-detection, using Clarifai's API.
Equipped with a database, user authentication, and a ranking system.
github.com/AverageLeo/Eagle-Vision | github.com/AverageLeo/Eagle-Vision-api

McDownload's: A restaurant tool built with React, build your custom burger, get an order summary and confirm your order!
github.com/AverageLeo/McDownloads

Portfolio: Built from scratch to showcase my design abilities and my experience.
Full compatibility for desktop, tablet and mobile devices.
github.com/AverageLeo/Portfolio | www.ArieLevental.com

RoboFriends: RoboFriends displays cards of robots with image, name and email. You can search for your favorite robot. It fetches data from an API.
github.com/AverageLeo/RoboFriends

Experience

2017 – 2019

IDF: Israeli Air Force - Team Leader - Aircraft Engine Mechanic. My role demanded working in stressful conditions, responsibly, leadership and excellent interpersonal skills.
